EXPERIENCE

Full Stack & Mobile Developer (Next.js, Express.js, Flutter)

Prospera Servicios Financieros

📅 09/2024 - Present 📍 La Paz, Bolivia

Within this fintech company, as a frontend developer, I am responsible for enhancing the user experience on Prospera's main websites. My responsibilities range from bug fixing to the development of new features, utilizing React.js, Next.js, and TypeScript as core technologies. Additionally, as a backend developer, I actively participate in the creation and maintenance of endpoints for Prospera's various APIs, developed using Express.js, ensuring the reliable performance of server-side services. And in the mobile section, together with the development team, we use the Flutter tool, in order to provide the common user with Prospera services on their mobile device.

Front End & Mobile Developer (Angular, Ionic)

Sommos

📅 01/2024 - 02/2025 📍 Santa Cruz, Bolivia

I collaborated with the development team to design and implement a visually appealing and interactive user interface, leveraging Angular for web development and Ionic for native app development. I actively contributed to the team's workflow by using Git and GitHub as the primary tools for version control and project management.

EXTRACURRICULAR

React Native Class Assistant

Universidad Privada Boliviana

📅 07/2024 📍 La Paz, Bolivia

As a Teaching Assistant for a mobile development course I provided:

- Examples on JavaScript paradigms
- Explanation of React Hooks
- Use of state management with Redux, useReducer, and Zustand
- Form handling using react-hook-form and Formik
- Styling with Native Wind and Gluestack UI

Front End Developer (React.js)

Universidad Privada Boliviana

📅 03/2023 - Present 📍 La Paz, Bolivia

During this volunteer I have been:

- Collaborating with my team on the development of a web application aimed at assisting students with lunch reservations and facilitating discussions
- Utilized various technologies, including Next.js, React Hooks, Tailwind CSS, Git, GitHub and Firebase

NASA International Space Apps Challenge La Paz Organizer

Space Apps Challenge

📅 08/2023 - 10/2023 📍 La Paz, Bolivia

During the time I was part of the NASA International Space Apps Challenge La Paz Organizer Team:

- Contributed to the event's promotion in collaboration with the Marketing team
- Raised awareness about the event among young individuals and enthusiasts
- Promoted the creation and implementation of projects that contribute positively to society and the future

Relational Database Class Assistant

Universidad Privada Boliviana

📅 02/2023 - 03/2023 📍 La Paz, Bolivia

As a teaching assistant for a relational database class I provided:

- Leveraged tools like DataLemur.com to enhance comprehension
- Responded to inquiries related to class content, ensuring students grasped
- Key concepts
- Provided guidance and support to students as they worked on their MySQL database projects, aiding them in successfully completing their assignments

ABOUT ME

I am José, a Software Engineer with an unwavering passion for web and mobile development. My journey in the tech industry has been driven by a deep enthusiasm for crafting user-centric digital experiences and building robust RESTful API systems following established CRUD methodologies. I thrive in the ever-evolving landscape of technology, continuously seeking opportunities to apply my expertise and grow alongside innovative teams.
